COUNTY EXECUTIVE

**RESOLUTION OF THE
ONONDAGA COUNTY PLANNING BOARD
Meeting Date: 1/7/2026
OCPB Case # Z-26-6**

WHEREAS, the Onondaga County Planning Board, pursuant to General Municipal Law, Section 239 l, m, and n, has considered and reviewed the referral for a ZONE CHANGE from the Town of Manlius Town Board at the request of Michael Jeffries for the property located at 4555 Pompey Center Road; and

WHEREAS, General Municipal Law Section 239-m allows the County Planning Board to review the adoption or amendment of a zoning ordinance or local law and the site is located within 500 feet of Pompey Center Road (Route 10) and Broadfield Road (Route 250), both county highways, and the municipal boundary between the Town of Manlius and the Town of Pompey; and

WHEREAS, the applicant is proposing a zone change on an 11.84-acre parcel from Residential (R-5) to Restricted Agricultural (R-A) for a proposed future 3-lot residential subdivision.; and

WHEREAS, the proposed action is further summarized in the attached staff report and may be subject to additional county, state, and/or federal regulations, which may be cited in the staff report; the municipality and applicant are advised to contact the appropriate agencies to ensure these regulations are met, as applicable, prior to or as a condition of municipal approval of the project; this is not an exhaustive list of permit requirements by agencies, but is intended to represent some of the most common regulations; and

NOW THEREFORE BE IT RESOLVED, that the Onondaga County Planning Board has determined that said referral will have no significant adverse inter-community or county-wide implications. The Board has offered the following COMMENT(S) in regards to the above referral:

1. Development in floodplain, floodway, wetland and steeply sloped areas, and in close proximity to Limestone Creek is generally discouraged as it may have a negative impact to the waterway and its associated habitats, drainage patterns, and regulated and practical buffer areas may impact the viability of buildable lots. Public infrastructure extension may also be necessary to serve proposed lots. The Town is encouraged to define the developable envelopes of proposed New Lots 2A, 2B and 2C, and ensure that each of the proposed lots can reasonably accommodate development as envisioned, without significant negative impacts, prior to approval of the proposed zone change.

The Board further encourages that a conveyance of land or a conservation easement to be held by the Town or a land trust, be considered for lands along Limestone Creek, to protect the remaining,

sensitive lands on the site in perpetuity.

2. The Onondaga County Department of Transportation requires the applicant to coordinate Pompey Center Road access plans with them. The municipality must ensure any mitigation as may be determined by the Department is reflected on the project plans prior to, or as a condition of, municipal approval.

RECOMMENDATION: No Position With Comment

JURISDICTION:

General Municipal Law Section 239-m allows the County Planning Board to review the adoption or amendment of a zoning ordinance or local law and the site is located within 500 feet of Pompey Center Road (Route 10) and Broadfield Road (Route 250), both county highways, and the municipal boundary between the Town of Manlius and the Town of Pompey

SUMMARY:

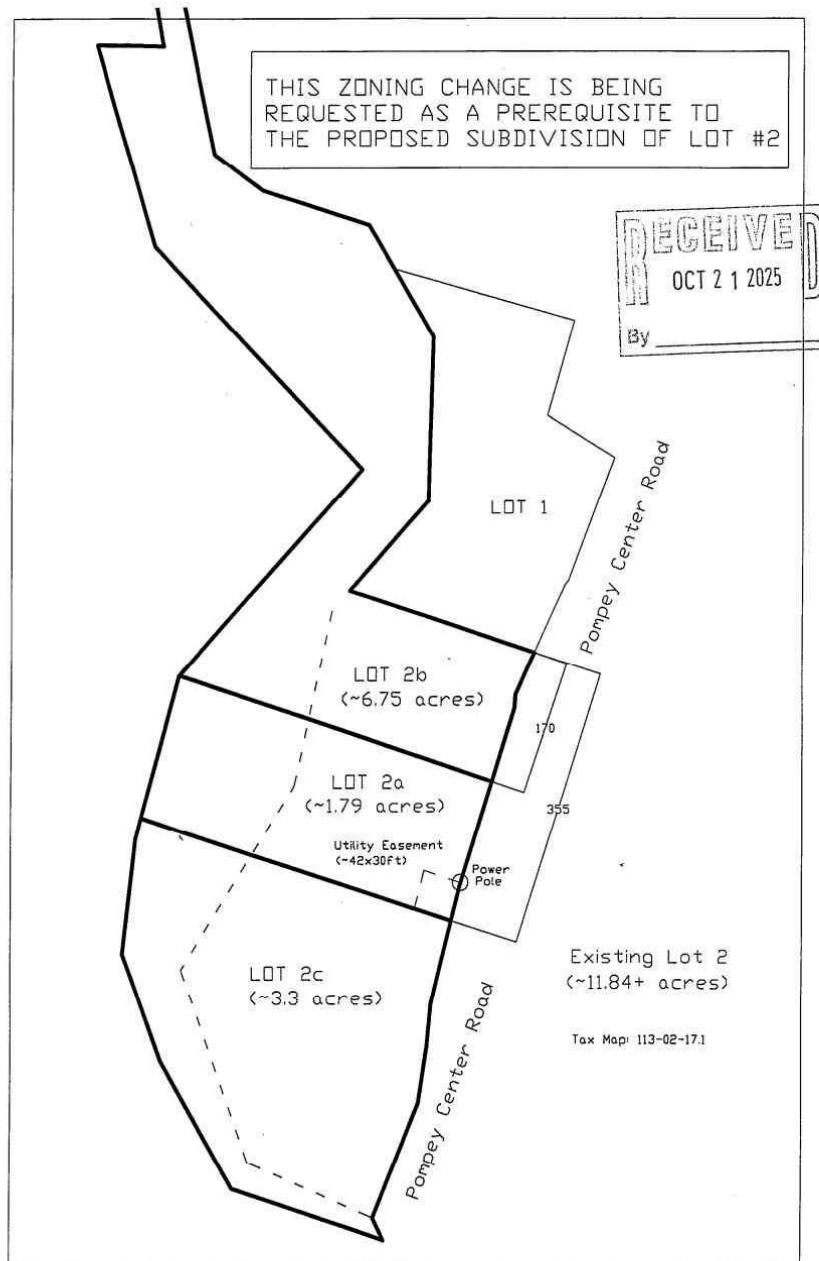

the applicant is proposing a zone change on an 11.84-acre parcel from Residential (R-5) to Restricted Agricultural (R-A) for a proposed future 3-lot residential subdivision.

STAFF REVIEW:

Nearby Uses/Setting: The 11.8-acre parcel is located east of the Village of Manlius and contains the Edwards Falls waterfall and a portion of Limestone Creek which in this location runs predominantly north to south, between residential neighborhoods to the west and east. The site contains a single-family home near the southern end of the parcel.

Limestone Creek is located at a lower elevation and the site contains steep slopes on both sides of the Creek with grade changes of 50 to 60 feet.

Access: The site has frontage on Pompey Center Road. Per aerial imagery, the existing home has a driveway to Pompey Center Road, north of Limestone Creek.

ADVISORY NOTE: Per the Onondaga County Department of Transportation, all existing or proposed driveways on Pompey Center Road must meet Department requirements.

Proposed Zoning: The applicant is requesting a zone change from R-5 to RA to allow a future 3-lot residential subdivision.

Per the Town Code, R-A allows uses permitted in Residential Districts R-1 and R-3, "according to the same restrictions, or a two-family dwelling". Bulk requirements are dictated by the lot's access to sanitary sewer, requiring a minimum of 150' frontage and a minimum lot size of 40,000 sf (0.92 acres). The proposed lots appear to meet these requirements.

Proposed Site Layout: A diagram included with the referral materials indicates the proposed zoning change is "being requested as a prerequisite to the proposed subdivision of Lot #2" and showing the subject parcel (11.84 acres) is to be split into Lots 2c (3.3 acres), 2a (1.79 acres), and 2b (6.75 acres). Per the diagram, it appears the existing house will be located on the southernmost lot, proposed Lot 2c. All lots contain significant portions of Limestone Creek and its associated floodplain, floodway, and state and federal wetlands.

Floodplain/Flood way: Current FEMA Flood Insurance Rate Maps (FIRM) indicate the presence of the 100-year floodplain and floodway associated with Limestone Creek, which may require avoidance or elevation of structures and other mitigation. Boundaries of the floodway and floodplain are not indicated on the referral materials.

ADVISORY NOTE: The Onondaga County Hazard Mitigation Plan has identified flooding as a natural hazard of local concern, with the potential to cause extensive threat to property and safety. Buildings within the floodplain can negatively affect the free flow of nearby waterways and drainage, and building within a floodplain is therefore discouraged.

Wetlands: GIS mapping shows the site contains Limestone Creek, a federally protected riverine waterbody, and associated state wetlands. Delineated federal and state wetland boundaries are not indicated on the referral materials.

ADVISORY NOTE: Wetland regulations require the applicant to contact the U.S. Army Corps of Engineers and/or NYS Department of Environmental Conservation to confirm the presence of federal and/or state wetlands and/or the 100-foot state wetland buffer on the site. All confirmed wetlands should be shown on the plans for the site and any necessary permits should be obtained for any proposed

For agency contacts and additional information about advisory notes, please visit: <http://ongov.net/planning/ocpbresources.html>

development or placement of fill in a wetland, or drainage of any confirmed wetlands and buffers.

Drinking Water: A new connection to public drinking water will be required for future development of the proposed residential lots. The existing house is served by public drinking water.

ADVISORY NOTE: OCWA's Engineering Department requires the applicant to contact them to determine water availability and service options, obtain hydrant flow test information, evaluate backflow prevention requirements, and/or request that the Authority conduct hydrant flow testing to assess fire flow availability.

Wastewater: A new connection to the public sewers will likely be needed for the future development of the proposed residential lots. The existing house is served by public sewers and is located in the Meadowbrook-Limestone Wastewater Treatment Plant service area. Per GIS Mapping, sewer infrastructure is located across Pompey Center Road from the site.

ADVISORY NOTE: The Onondaga County Department of Water Environment Protection (OCDWEP) requires capacity assurance due to an anticipated increase in use. Additionally, unless it can be demonstrated that anticipated sanitary flows will not exceed previous flows in excess of one sewer unit over prior uses, the applicant must develop a 2 gallon to 1 gallon sanitary flow offset plan/project in coordination with the municipal engineer. The Capacity Assurance Form and approval process can now be found online: <http://ongov.net/wep/connections.html>

Plants/Animals: The site may contain the Northern Long-eared bat, or its associated habitat, which has been listed by the state or federal government as a threatened or endangered animal species (per EAF Mapper). Impact to bat species are often associated with tree clearing and from aerial imagery that some trees will be removed as part of the proposed development of the site.

ADVISORY NOTE: Per the NYS Department of Environmental Conservation (DEC), if the site contains a threatened or endangered species and/or associated habitat, and the project requires review under the State Environmental Quality Review Act (SEQRA), a request for a project screening should be submitted to the New York Natural Heritage Program or to the regional DEC Division of Environmental Permits office.

RECOMMENDATION: No Position With Comment

Comment(s): 1. Development in floodplain, floodway, wetland and steeply sloped areas, and in close proximity to Limestone Creek is generally discouraged as it may have a negative impact to the waterway and its associated habitats, drainage patterns, and regulated and practical buffer areas may impact the viability of buildable lots. The Board further encourages that a conveyance of land or a conservation easement to be held by the Town or a land trust, be considered for lands along Limestone Creek, to protect the remaining, sensitive lands on the site in perpetuity.
